Paul,

LaVon faxed me the following information:

LaVon Giles
EQUIP contract
Arcadia
Seeding recommendation

Twenty one pounds per acre. Broadcast with disturbance (dragging) to bury seed. Target seed depth of .25 inches.

Crested Wheatgrass 20 lbs. PLS/AC
Yellow Sweetclover 1 lb. PLS/AC

Brett Prevedel
District Conservationist

Lavon did say that the seeding had been completed before we visited the site last week.

Clark

The form is at this web site.

https://fs.ogm.utah.gov/pub/mines/minerals_related/forms/MR-SITE.pdf

I will be heading to Vernal next week and could stop either Tuesday or Thursday to do a release inspection. If possible, I would like to coordinate with Mike Hyde from the county.

What's the status of the Myrin Pit?

Paul,

We have reclaimed the Giles pit and he has reseeded the property. What form do I need to submit to get the bond released and this permit closed.

Clark D. Prothero, P.E.
